PACK FORMAT

200 ml glass bottle

Pack formats

- 200 ml glass bottle

What you can change

- Anchovy content: Choose the published 65% anchovy formulation or a premium-grade option with a higher anchovy extract content.
- Nitrogen level: The published line specifies total nitrogen above 4 g/L, with grade selection based on the target product profile.
- Salt level: The published specification ranges from 24 to 27% salt.
- Preservative: Available with sodium benzoate as published, or as a premium extract with no preservative named.
- Pack format: Available in 200 ml glass bottles, with larger foodservice formats available depending on the program.
